

DuoFLEX® MRI Coil Suite

VALUE FOR ADMINISTRATORS

The DuoFLEX® MRI Coil Suite contours to your patient and your budget, offering flexibility without compromise. The suite includes two 10cm and two 24cm coils which provide versatility for the technician and comfort for the patient. The DuoFLEX design helps deliver high-resolution imaging, even on old scanners, that radiologists can depend on to make accurate diagnoses.

IMPROVE YOUR BOTTOM LINE

Replace multiple costly coils with one DuoFLEX® MRI Coil Suite. DuoFLEX® extends the life of your MRI equipment, increases productivity, and delivers a quantifiable ROI. You will measurably – and cost effectively – improve efficiency and the standard of care for your patients. Streamlining workflow shortens time between scans, giving your team the opportunity to add more studies every month; thereby helping to turn your cost center into a profit center.

Benefits:

- **Extend the life of your capital hardware** by replacing old coils at an affordable cost and deferring large capital expenditures
- **Increase efficiency and throughput** by reducing exam preparation time, leaving DuoFLEX in place for multiple, sequential studies
- **Accommodate your budget** with flexible payment and rental options

ACQUISITION FLEXIBILITY

Budget - Capital Hardware Purchase

When your needs match your budget cycle, purchase DuoFLEX® MRI Coil Suite as capital hardware.

36-month Installment Program

You've got budget approval but want to allocate payments over a 36-month, low-interest purchase plan; financed directly with MR Instruments.

Rental Program

The DuoFLEX® rental program offers an immediate implementation solution without time or financial commitment. If you like the product, you can apply twelve months of rental payments toward a capital purchase.

"Since implementing DuoFLEX® MRI Coil Suite we are performing approximately 10 additional studies per month. Our market's specialty practices that own their own MRI scanners are viewing us as a compliment to their services now that we are showing them our capabilities with the DuoFLEX."
