

# DuoFLEX® MRI Coil Suite

## VALUE FOR RADIOLOGISTS

The DuoFLEX® MRI Coil Suite contours to your patient and your budget, offering flexibility without compromise. The suite includes two 10cm and two 24cm coils which provide versatility for the technician and comfort for the patient. The DuoFLEX design helps deliver high-resolution imaging, even on old scanners, that radiologists can depend on to make accurate diagnoses.

## SEE WHAT YOU NEED TO SEE, WHEN YOU NEED TO SEE IT

Achieve definitive diagnoses on sub-optimal anatomy and hard-to-scan patients. The DuoFLEX® MRI Coil Suite acquires the quality images you need time after time, while maximizing patient comfort.

### Benefits:

- **DuoFLEX technology** improves image quality, especially on older scanners.
- **Flex-fit paddles** contour to small and large anatomy which increases SNR
- **High resolution** for small-parts imaging, with 10cm paddles, supports more accurate diagnoses of hard-to-scan anatomy
- **DuoFLEX® 24cm and 10cm coils** work interchangeably for the best imaging outcomes

*"The high-resolution 10cm DuoFLEX® paddles are quickly becoming one of my favorite imaging tools!"*

*- J. Walsh, MD*

*"Anatomy-specific coils such as for the wrist are expensive. We've found that a flexible coil suite like DuoFLEX® can supplement or take the place of several rigid, anatomy-specific coils with equal or even better image quality."*

*- Andreas Melzer, MD*
