

Versatility -
Any anatomy
with one coil !

"These coils are capable of scanning anything that will fit into their FOV."

Brad Hess, MRI Technologist, Deer Valley

Value Proposition:

ONE SIZE FITS ALL

DuoFLEX® has a wide range of capabilities, allowing our center to literally scan patients from head to toe. The various flex coil combinations support our ability to best position and image the variety of patients that visit our clinic. With DuoFLEX® we don't have to turn anyone away!

Clinical Review - A Comprehensive Solution

Being a busy outpatient center scanning over 25 patients daily, we needed a coil that would allow for easy table transition times and quick and comfortable patient set-up, all while producing high image quality. DuoFLEX® answers the challenges that MRI technologists face daily.

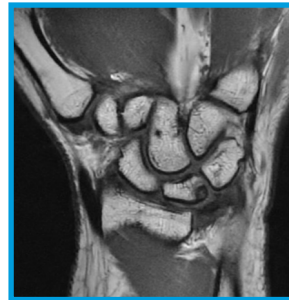

At our site DuoFLEX® has facilitated for high image quality, versatility, and speed of scanning and we are using the Suite on a 12x GE scanner. These coils are capable of scanning almost anything you put them to. We use them for female pelvis exams, hips, brachial plexus, brain, TMJ's and muskloskeletal imaging. DuoFLEX® coils are outstanding coils!
